SUMMARY

Full Stack Developer with over 3 years building React.js and Node.js applications for enterprise clients. Experienced in REST API development, performance optimization, unit testing (Jest, React Testing Library), and cross-platform delivery across web, mobile, and desktop. Shipped production dashboards, real-time data systems, and Flutter mobile apps using the MERN stack in industrial and analytics environments.

SKILLS

Frontend: React.js, Next.js, Redux, JavaScript (ES6+), TypeScript, Vue.js, HTML5, CSS3, Tailwind CSS, Three.js, Chart.js, Plotly.js

Backend: Node.js, Express.js, REST APIs, GraphQL, JWT Authentication, Mongoose, Firebase Authentication

Database: MongoDB, Firebase (Firestore, Realtime DB), SQL

Mobile & Desktop: Flutter, Dart, Electron, Apache Cordova

Testing & DevOps: Unit Testing, Jest, React Testing Library, Docker, CI/CD, AWS (S3, CloudFront), Git, GitHub, Webpack, Postman

Languages & Methods: Python, Performance Optimization, Agile, Scrum

WORK EXPERIENCE

Hitachi India Pvt. Ltd. (via Randstad) **Sep 2023 – Present**

Full Stack Developer (Junior Research Engineer)

- Architected and shipped **4+ full-stack dashboards** in React.js and Node.js/Express.js for 3 enterprise clients; real-time industrial data loads in under 2 seconds.
- Built MERN stack applications handling **10,000+ concurrent data points**; Redux state refactor cut redundant API calls and improved UI response time by 35%.
- Developed **2 Electron desktop apps** (Windows + macOS) for client demos; set up a CI/CD pipeline that reduced manual build-to-deploy time by 50%.
- Built Flutter/Dart mobile apps consuming REST APIs, matched designs exactly across Android and iOS; packaged **3 React.js projects** as Android APKs using Apache Cordova.
- Built Node.js/Express.js services with MongoDB, Firebase Auth, and real-time Firestore sync; **maintained 99%+ data consistency** across concurrent client sessions.

Hitachi India Pvt. Ltd. **Feb 2023 – May 2023**

Software Engineering Intern

- Built a real-time machine monitoring dashboard (React.js + Redux) tracking **5+ production lines**, removing manual data entry and cutting reporting delays by 40%.
- Rewrote Redux state logic and batched API calls; combined with Chart.js/Plotly.js rendering improvements, **dashboard load time dropped by 30%**.

Acadlift.com (Igni eCommerce Pvt. Ltd.) **Jun 2022 – Jul 2022**

Frontend Engineering Intern

- Built a **React.js component library (15+ components)** with REST API hooks, cutting code duplication by 40% across 3 parallel development streams.
- Shipped 4 frontend modules across agile sprints in a team of 6; standardized components cut release time by 20% per cycle.

GoPerspective Technologies LLP **Sep 2021 – Oct 2021**

Frontend Development & Analytics Intern

- Built analytics dashboards that pulled ML model outputs via REST APIs, saving 3 stakeholder teams **50% of their manual reporting time per week**.
- Cleaned **50,000+ row datasets** in Python and designed UI prototypes that helped non-technical users read model results without assistance.

iSchoolConnect Technologies Pvt. Ltd. **Apr 2021 – May 2021**

Design & Analytics Intern

- Designed UI layouts for **5+ event portals**, standardizing the component structure and cutting design revision rounds per release from 4 to 2.
- Produced **20+ assets** (banners, social graphics, landing graphics) for 3 product launches across digital channels.

EDUCATION

Kurukshetra University (JMIT Radaur) **2019 – 2023**

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.43

CERTIFICATIONS

Meta Front-End Developer Professional Certificate (Coursera) — Mozilla JavaScript Foundations Professional Certificate
